June 17-21, **2012**

4th international conference on plasma medicine

June 17-21, 2012

plasma cell and plasma tissue
interaction

medical aspects and results of
plasma in use

plasma sources for medicine

plasma surface modification for
biomedical application

plasma based sterilization
/decontamination

Plasma Medicine is a rapidly growing field that poses many **technological challenges** and brings to the forefront many fundamental questions regarding the **mechanisms of interaction** between **living organisms and plasma**.

The aim of this conference is to create a forum that **brings together professionals** from the fields of **plasma, medicine, biology and biochemistry** in order to develop a **common language**, to better define key challenges and open questions and to move toward **effective solutions**.
